

Remarks

Reconsideration and allowance of the above referenced application are respectfully requested.

Initially, the indication that claims 7-14 would be allowable if rewritten to obviate the rejection under 35 USC 112, second paragraph is appreciatively noted.

Claims 7-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite. In response, these claims are amended herein to obviate the rejection.

Specifically, the rejection to claim seventh states that it is unclear what structure or device controls or performs these operations. Claim seven has been clarified to make it clear that the graduated scale is used to adjust the base position of the lamp. As noted by the official action. While an installer might be the one who uses a graduated scale for these functions, claim seven has been required amended to clarify that a "controller" is used for controlling the lamps to move commonly.

Claim 10 past similarly been amended, to clarify that a computer based controller controls the different lamps to move commonly. Again, the attaching and loosening and adjusting and subsequently tightening of this claim might be carried out by installing technician.

The antecedent basis rejection has been obviated herein by amendment.

This should render all of the claims into condition for allowance. A formal notice of allowance is hence respectfully requested.

If the Examiner believes that communications such as a telephone interview or email would facilitate disposal of this case, the undersigned respectfully encourages the Examiner to contact the undersigned.
